EXPERIENCE

Good Pair Days
Aug 2021 – Present
As a frontend developer on the Platform team, I've contributed to enhancing the website's functionality, including translation support, Stripe payment integration, and performance optimizations. I've implemented new designs and features across the web and mobile app.

Blockonomics
Feb 2021 – July 2021
During my time at Blockonomics I worked with PHP, Python, WordPress and other CMSs in order to make it easier for customers to access Blockonomics' payment solutions.

Nohall Solutions
Aug 2018 – Feb 2021
During this time I worked as a freelancer to create websites for a range of clients. This required good communcation and adapting the tech-stack to be in line with the clients need. Usually I relied on the MERN-stack, to create a flexible platform that could be easily adapted. During this time I also worked with frameworks such as Three.js.

SKILLS

- React
- Node
- GraphQL
- TypeScript
- React-Native
- Next
- CSS
